Air Consum. 44.3 pd/sqin/min Computer Cyber Aqualand NX

Lots of particulate in the water, low visibility (5-10 feet resolvable) There was lots of life on the barge and around the APCs but didn't see anything large this dive. My right fin came unsnapped and when I finished resnapping it Susan and Todd were gone. I joined up with a second group from out boat and met up with them on the surface.
